

HB-15 Pouch Machine

The Effytec HB-15 Horizontal Pouch Machine is a new generation of intermittent motion pouch machine designed to meet the challenges of the dynamic horizontal form-fill-seal pouch market. The HB-15 is able to be configured for a wide variety of package formats including three and four sided seal, stand-up pouches with shapes, zippers, fitments, hanger holes, and is suitable for many types of products including powders, granulated products, tablets, liquids, pastes and solid formats.

Configurations:

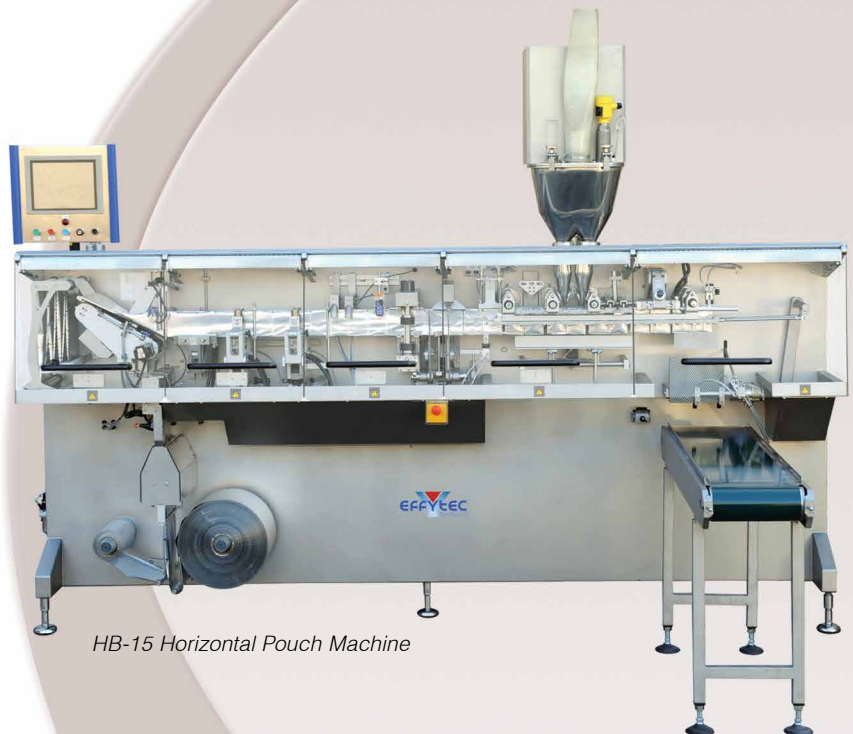

Speed:

- Up to 100 cycles per minute
- *Speed capability based on package size, product and packaging material to be used.

Features:

- Compact machine design
- Parallel motion side sealing
- Sanitary design, stainless steel construction
- Low maintenance and high durability cutting device
- Machine setup recipe storage
- Remote tele-modem assistance
- Low inertia dual cam roller (patented)
- Servo driven film pull rolls
- Simplex and Duplex configurations
 - Simplex Pouch Size Range -
 - Width: 60-150 mm (2.36-5.9 in)
 - Height: 60-175 mm (2.36-6.89 in)
 - Duplex Pouch Size Range -
 - Width: 40-75 mm (1.57-2.9 in)
 - Height: 60-175 mm (2.36-6.89 in)

Ideal for:

- Cosmetics
- Food & beverages
- Granulated products
- Liquids & sauces
- Nutraceuticals
- Pharmaceuticals
- Powders
- Tablets

Who is Effytec?

Effytec Technology:

Industry's most advanced HFFS pouch machine, patented throughout, offering many standard features that include a clean compact stainless steel balcony design, a patented direct drive low inertia cam drive system (protected in rear cabinet), parallel sealing (patented triple "T" sealing with quench on Doypacks), auto film alignment, auto film splice, cam lubrication and illuminated rear drive cabinet with electrical controls housed within the same compact frame. Effytec machines outperform the others in output, overall performance, make better quality pouches, and require less maintenance.

Headquarters:

- Located in Barcelona, Spain
- Founded in 2004 with heritage dating back to the 1980's
- Technology leader for Horizontal Form, Fill, Seal Pouch machines
- Offering innovative machinery solutions

North America:

- Effytec USA is the distributor for Effytec in the United States, Canada, Australia and New Zealand.
- Co-located in De Pere, Wisconsin (suburb of Green Bay) with the co-owned businesses of Circle Packaging Machinery, Inc., (multi-lane 4-sided seal sachet machines) Campbell Wrapper Corporation (Campbell flow-wrappers and Parsons-Eagle net weigh scales and pre-made bag filling systems) and JUNAPACK (rotary motion fill-seal pre-made pouch machines).
- 70+ machine installation references in North America
- Key focus on customer support with access to a large team of service technicians within our De Pere, WI group.
There is a spare parts inventory and available machine shop for parts fabrication.
