Labels	Glassine
Corrugated	Card Stock
Gift Cards	Flat Stackable Products

**MODEL:
PULSE™**

Model Pulse
with 16" Tall Magazine

FEATURES & BENEFITS:

- Quick Release features allows operator to remove belts without the use of tools.
- Standard Servo Drive offers a smooth indexing motion.
- Pivoting product containment device can be positioned out of the way to allow operator easy access to perform machine set-up or clear product jams.
- Quick and easy product changeover means less downtime and greater machine efficiency.
- Touch Screen HMI makes the machine easy to operate.
- Many options available including discharge extension, vertical placement, and U-Board folding modules, allowing customization of the machine to meet your specific needs.

PULSE™ FRICTION FEEDER

TYPICAL UTILITY REQUIREMENTS:

ELECTRICAL: 115 VAC 10 Amps Max

MAXIMUM SPEEDS:

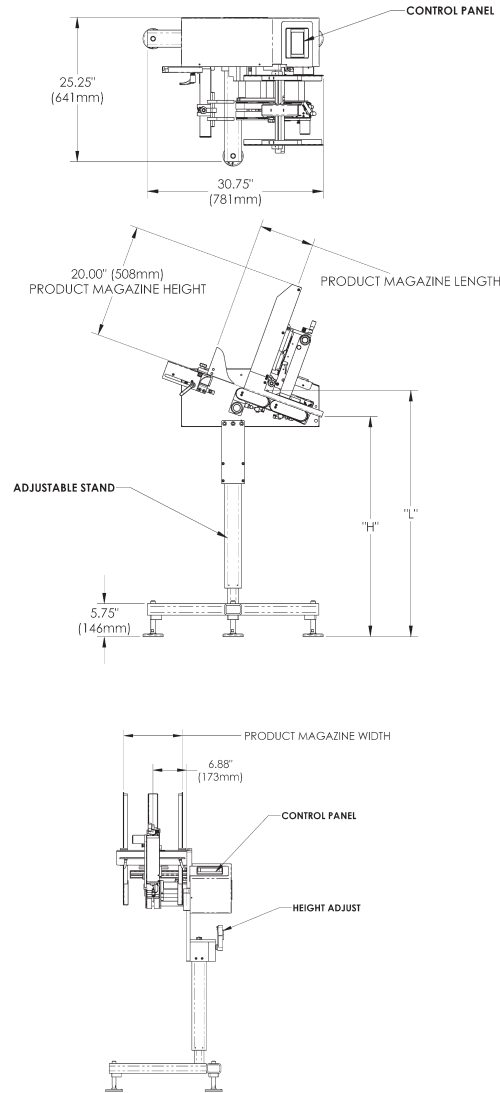

- 300 Products Per Minute
(dependent on product length)

OPTIONS AVAILABLE:

- Extended Discharge Module
- Vertical Placement Module
- U-Board Folder Module
- Batch Counting
- 12" (305mm) Wide Machine
- Extended Capacity Magazine
- Floor Stand CRS or SS
- Screw Height Adjustable Stand
- Double Detection
- Stack Light with Audible Alarm
- Inline Bar-Coding
- Inline Vision Inspection
- Low Magazine Detection

PRODUCT SIZE RANGE:

- Minimum: 2" (51mm) x 2" (51mm)
- Maximum: 12" (305mm) x 16" (406mm)
