

Monobloc Features

Countless Capabilities

The Monobloc performs a wide range of tasks such as sorting, feeding, filling, plugging, stoppering, crimping, capping, induction sealing, labeling, and accumulating in a compact footprint. This state-of-the-art liquid packaging system is capable of filling water-thin to viscous products into a variety of container shapes and sizes.

- 💧 A variety of liquid metering systems are available to provide a fill volume range of 0.5 ml to 500 ml per cycle
- 💧 User friendly HMI touch screen with menu-driven programs that electronically adjust operating parameters for quick and easy tool-less changeovers
- 💧 Proven servo motor driven technology
- 💧 Optional HEPA filtration system

Versatility, Precision, and Accuracy

Customized Fill/Finish Packaging System

Filamatic offers several models that can be customized to suit your unique application. The versatility, precision, and accuracy of the Monobloc make it ideal for:

- 💧 Unique container configurations
- 💧 Multiple fill volumes and container sizes
- 💧 Aseptic filling requirements
- 💧 Increased automation and efficiency
- 💧 Research and Development
- 💧 Compact production spaces

Built To Order, Built To Last
